50X1-HUM

An installation alleged to be a jamming transmitter is located near Silherovice (49°55' N - 18°20' E), about 400 meters off to the right of the road from Silherovice to Hat (49°57' N - 18°14' E). The installation site is almost round, with a diameter of 300 to 400 meters; this entire area is fenced in with barbed wire. In the middle of the area is a large wooden tower, on top of which a number of curved wires, presumed to be antennae, were observed. About five meters from the tower is a wooden structure five meters long, four meters wide and three and one-half meters high. There are also two wooden watch towers about 10 meters high with a small booth on top for the guard. The watch towers are located near the barbed-wire fence, one on the southern side and one on the northern. It is alleged that strong searchlights are installed in the booths atop the towers. Four soldiers were observed in front of the small wooden structure, which is believed to be the soldiers' barracks.
